DPH
Doncaster Plumbing & Heating Ltd.

Award-Winning

Here at Doncaster Plumbing & Heating, we install boilers from a **wide range of different brands**, that include Worcester Bosch & Ideal. We can provide you with a variety of different options based on your home heating requirements.

We want to offer only the best boiler brands on performance and reliability. Worcester Bosch has won the best gas boiler for 11 years in a row with Which? and is a popular choice for homeowners.

Get up to a 12-year guarantee or warranty on selected new Worcester Bosch or ideal boiler

When buying a new Worcester Bosch or Ideal boiler, it will be supplied with a guarantee or warranty as standard. However, you can get different length guarantees depending on your boiler and accessories.

Our Worcester Bosch Lifestyle boilers (supplied with a filter) now come with a 12-year guarantee. For ideal boiler the Vogue Max has the option for a 12-year warranty.

Energy Efficiency

Your heating system can have a huge impact on the energy efficiency of your home. The less energy we use to heat our homes, the less our carbon footprint is, and it's one of the easiest ways to reduce our personal impact on the planet.

Paired with good insulation, an efficient boiler will also allow you to heat your home to a comfortable level at a lower setting.

Read our tips and advice on how to make your home and heating system more energy-efficient, to help you save on your energy bills.

Make the right choice

Buying a new energy-efficient boiler is a big commitment, which usually requires research to make sure you are getting the right boiler for your home.

When choosing your new boiler, you want to have peace of mind that it'll last for years to come. We supply a wide range of boiler brands and we will provide you with the best options based on your home heating requirements.

Your Local Worcester Bosch or Ideal Installer

As your local Worcester Bosch & ideal accredited installer we are here should you be considering replacing your old boiler.

As a business, we believe in delivering an exceptional level of service to all our customers. We do not baffle you with technical jargon, just helpful advice so you can make the right decision.

100% Customer Satisfaction

We value our customers and as such prioritise our customer service and quality of work. We have a simple but effective approach, striving to ensure our customer's needs are met and all our staff have a personal and friendly approach.

- Worcester & Ideal accredited installer
- Gas Safe registered
- Committed safe in your home Installer
- Fast response to emergencies
- Friendly team and exceptional customer service

What is 'safe in your home'?

Worcester Bosch has created **guidelines and communication tools** which are designed to help installers demonstrate that a safe and secure environment is their focus for any boiler installation and maintenance.

We appreciate that you may have concerns and reservations about allowing our surveyors and engineers into your home. As a **Worcester Accredited Installer**, we work to the guidelines to ensure that we take every step possible to demonstrate a safe and secure environment for both our staff & customers.

Our Valued Customers

The safety and well-being of our customers and installers/service engineers are always our number one priority, even more so now with the ever-changing progression of the Coronavirus outbreak, we are committed to doing everything we can to protect the wellbeing of our customers and our colleagues.

You can now have complete peace of mind that we are doing everything possible to keep everyone safe whilst in your home.

Our Protocols

Before we start any work in your home, we will do a risk assessment to maximise safety for all involved. Our engineers will adhere to strict social distancing and at all times ensure that they have appropriate PPE.

We will wash our hands using our own hand wash, soap and sanitiser. Additionally, there will be frequent cleaning of objects and surfaces that are touched regularly, using our usual cleaning products.

7 ways to keep your home warm (and save money) this winter

In the UK, homeowners typically tend to switch their central heating on in October and use it daily until March or April. During the pandemic, most of the population has been at home much more than in previous years. With this, there is no better time to ensure that you keep your home warm, but keep the focus on your energy costs.

We know that there are many ways to keep your home warm (and save money). We have and listed our top 7 below:

01

USE YOUR CURTAINS

The heat from the sun is free so make the most of it. Open your curtains and let the sunlight in during the day to make use of this free heat.

02

INSTALL THERMOSTATIC RADIATOR VALVES

Research shows that installing heating controls and thermostatic radiator valves results in energy savings of around 40%

03

MAXIMISE YOUR INSULATION

When it comes to heat, around 25% is lost through the roof. This can be easily reduced by installing 25cm of insulation throughout your loft.

07

IS YOUR BOILER ENERGY EFFICIENT?

Boilers might not seem like the most exciting subject but you could save a lot of money by making yours more energy efficient. In a nutshell, your boiler powers your heating. With about 60% of your energy bill going into keeping your home warm, the better your boiler efficiency, the lower your energy bills.

Modern condensing boilers are labelled between 92-94% efficient ErP (A-rated). Boilers over 25 years old can be as little as 60% efficient, or G-rated. This is why it's so important to know how energy efficient your boiler is as it can make a significant change in what you pay on your energy bills.

04

REFLECT YOUR RADIATOR HEAT

Radiator panels are relatively cheap, easy to install and ensure that heat from your radiators warms up your room and not your walls.

05

USE TIMERS ON YOUR CENTRAL HEATING

Set your heating to turn on 30 minutes before you get up in the morning. Don't waste your home heating if you are not at home.

06

WRAP UP WARM

If you have a hot water tank, make sure it is properly lagged – or insulated. This will keep the water warmer for longer, and reduce heating costs.
